Instant Voice-Over Recordings for Small and Medium Enterprises - IVONA Studio

PR Newswire

GDYNIA, Poland, March 24, 2010 /PRNewswire/ -- The IVO Software company is presenting the latest IVONA Text-To-Speech Studio package, intended for professional use in small and medium enterprises (SMEs).

The IVONA Studio package allows significant reduction in costs of producing voice-over recordings. In a traditional studio, the process of voice-over recording with a lector takes weeks and is very costly. From now on, due to the use of incredibly natural and expressive voices of IVONA Text-to-Speech everyone can create professional "speaking" marketing and training materials, multimedia presentations or recordings for telephone exchanges.

Each package of IVONA Studio contains IVONA Text-to-Speech voices offering the highest quality and speaking at the frequency of 22 kHz (sound sampling frequency) with extended license for use in a company and for public use of the generated speech. Additionally, each package contains free of charge IVONA Reader program which also can be used for commercial purposes. For the full list of products and services for SMEs please visit www.ivona.com.

At the same time, the IVONA Recordings service is available at the website of <http://www.IVONA.com>, which allows inexpensive creation of voice-over recordings directly at the web page.

More information on IVO Software

IVONA Text-to-Speech, one of the best TTS systems in the world, has been created and developed by the IVO Software Company. Its high standing has been confirmed by numerous distinctions and awards such as the main prize at the prestigious international Blizzard Challenge contest in 2006, 2007 and 2009, where the voice generated by IVONA Text-to-Speech was recognized as the closest to human. IVO Software develops specialty IVONA TTS versions applicable in business, telecommunications, mobile devices, everyday life as well as rehabilitation of the blind and visually impaired.
